Inkling

Manager, Content
Platform and Strategy
Mar 2013 - Apr 2014

Led a team of 4-6 designers and developers

Managed creation of design templates, HTML/SASS frameworks, and scripts that allowed us to scale digital book production process by 100x

Maintained and iterated Inkling Base, a Twitter Bootstrap equivalent for digital books

Led design and development of various interactive javascript pieces for clients

Inkling

Front-end Developer &
Designer
Jun 2011 - Feb 2013

Collaborated with publisher clients to design and develop nearly 50 interactive HTML5-based textbooks, cookbooks, and travel books

Researched, designed, and developed various digital publishing tools used internally and by vendors

Led initiative to utilize responsive web design in content

Led CSS modernization of entire library for cross-browser and cross-device support

Dual Aesthetic

Freelance Designer &
Developer
2005 - June 2011

Clients include YC-backed Like.FM, Rip Van Wafels, Laloo's Goat Milk Ice Cream, and Vital Wines

Crafted thoughtful identities, websites, and user interfaces, and marketing materials

Obtained and managed client relationships

Seedling Projects

Designer, Good Food
Awards
Sept 2010 - Feb 2011

Worked in a fast-paced and small team environment

Involved in end-to-end launching of the first Good Food Awards

Designed on-brand marketing, web, signage and print collateral

Providence, RI
ScB Biology, 2009

RELEVANT COURSES:
Object-Oriented Programming, Data Structures and Algorithms, Introduction to Statistics

Rhode Island School of Design

Providence, RI
Fall '07 & Fall '08

RELEVANT COURSES: Information Design, Typography

TECHNICAL SKILLS

I create my mock ups/wireframes in **Illustrator**. Sometimes I find **InDesign** and **Photoshop** useful as well.

I am at my most comfortable writing **HTML**, **CSS**, **SASS**, and **client-side JavaScript** in **Sublime Text**

I love information design and visualization and occasionally dabble in **d3.js** and **Processing**.

Web application frameworks I have worked with in the past include **Backbone.js**, **Angular.js**, and **Meteor**.

For content sites, I prefer **Jekyll** and **Wordpress**.

I occasionally find **regular expression** and **Python scripts** useful.
